8-SPEED AUTOMATIC TRANSMISSION

It glides with a smooth and quick efficiency, consistently using energy to its best advantage. This is Grand Cherokee's standard 8-speed automatic transmission. Its construction provides additional gears with no gain in weight, enhanced acceleration with reduced fuel consumption and increased torque with added strength to pull. This Grand Cherokee drives to appeal to a stratum of automotive connoisseurs who desire a premium driving experience paired with efficient performance. Fine-tuning elevates your ride quality to levels experienced in the most luxurious sedans. Engage the steering wheel-mounted paddle shifters when you want to customize your shift schedule. The best possible fuel economies can be attributed to a wide ratio spread that supports lower engine rpm while driving both in city traffic and on the highway. When equipped with a two-speed transfer case, run ratio is improved by 46 percent, enhancing Grand Cherokee's legendary excellence. Switch to the available Sport Mode and your shift schedule and engine power are both adjusted to hand over a sportier driving experience. It all adds up to a ride that delivers powerful strength without compromise.

ECO MODE

This selectable feature constantly works to maximize your fuel economy by automatically modifying the shift schedule of the 8-speed automatic transmission and torque converter. Your idle speed is gently lowered, allowing gains in precious L/100 km. The Multi-View Display in your instrument panel can inform you of just how efficiently Eco Mode is performing every kilometer along the way.
