RENEGADE

WHY DO WE CALL IT JEEP® ACTIVE DRIVE? BECAUSE THESE TWO 4x4 SYSTEMS CAN ACTIVELY TRANSITION FROM 4x4 INTO FUEL-SAVING FRONT-WHEEL DRIVE (FWD) FOR A WELCOMED GAIN IN EFFICIENCY. JUST KEEP THE SYSTEM'S STANDARD SELEC-TERRAIN® DIAL IN AUTO MODE AND RENEGADE WILL SEAMLESSLY MATCH ITS JEEP ENGINEERED CAPABILITY TO ANY ROAD CONDITION. TURN THE DIAL TO ANY OTHER MODE, AND 4x4 CAPABILITY IS ALWAYS ENGAGED.

- BEST-IN-CLASS<sup>2</sup> 4x4 CAPABILITY -

## CAPABLE OF SUPER POWERS

Both Jeep® Active Drive systems can keep you moving forward, even when just one wheel has traction on the ground. When this occurs, each system will automatically and seamlessly adjust to thrust a portion of the engine's power to the wheel (or wheels) with ground contact. This allows Renegade to really grab on and keep you moving forward.

This single-speed unit sends power generated from the engine and transmission to the wheel that needs it the most. This helps create the system's enhanced traction and dynamic driving performance.

POWER TRANSFER UNIT

The class-exclusive<sup>3</sup> disconnecting rear axle helps make Renegade one of the most fuel-efficient small 4x4 SUVs in its class. It can switch from 4x4 into FWD mode when Selec-Terrain® is in Auto mode, providing a noticeable uptick in mpg.

DISCONNECTING REAR AXLE

### FEATURES

#### EASY COME: HILL START ASSIST

Helps avoid roll-back when starting on steep inclines by keeping the brakes applied, giving you time to transfer your foot to the gas pedal. Standard.

#### EASY GO: HILL DESCENT CONTROL

Monitors throttle, speed and braking when gravity's pull wants to take over. Brakes are automatically applied for a safe and smooth descent. Exclusive on Trailhawk®.

JEEP ACTIVE DRIVE LOW  
BEST-IN-CLASS<sup>2</sup> 4x4 CAPABILITY ON TRAILHAWK

Get tough on the ridges and rocks with Jeep Active Drive Low, a one-speed system featuring Hill Descent Control. Its gnarly low range delivers a Trail Rated® 20:1 crawl ratio. Exclusive on Trailhawk.

# DIALED IN FOR ALL TERRAINS

No matter where you are, tackle Mother Nature's toughest conditions with the help of the available **Selec-Terrain® Traction Management System**, with the class-exclusive<sup>3</sup> Selec-Terrain dial, standard on every Jeep® Active Drive 4x4 system. Five selectable settings help deliver safe and secure driving stability so you can explore the wonders of the world as you see fit. Choose from Auto, Snow, Sand and Mud modes, and exclusive on Trailhawk® – the addition of Rock mode. You'll dial in to authentic 4x4 capability that can take you to places others only dream of reaching.

LATITUDE SHOWN IN SNOW-COVERED COMMANDO

Achieves impressive performance over snow- and ice-covered roads by maximizing vehicle stability and minimizing oversteer. Major systems automatically managed in this mode include antilock brakes and traction control.

### SNOW

Maximizes low-speed traction by allowing additional wheel slip via specifically tuned chassis controls, differentials and transmission ratios that are geared to successfully tackle mud.

### MUD

**AUTO**  
In Auto, Selec-Terrain® does all the work, automatically adjusting vehicle dynamics to gain fuel efficiencies, while allowing Renegade's performance to best suit the terrain.

### AUTO

This available mode exclusive to Trailhawk® delivers low-speed 4x4 capability thanks to its rear-differential locking element. This allows Renegade to command the world's most challenging terrain.

### ROCK

The system converts to a uniquely calibrated Sand mode that utilizes an aggressive throttle and up-shift points to tackle looser, sand-covered surfaces.
